National Key Laboratory of Human-Machine Hybrid Augmented Intelligence,
Xi'an Jiaotong University, China

Research Interests

Computer Vision & Multi-Modal Vision | 3D Vision & Scene Depth Perception

Education

- **Ph.D.** **Xi'an Jiaotong University [🌐]** *09 2019 - 06 2025*
  College of Artificial Intelligence, advised by Prof. Meng Yang. Xi'an, China
- **Joint Ph.D.** **Nanyang Technological University [🌐]** *12 2023 - 12 2024*
  College of Computing and Data Science, advised by Prof. Shijian Lu. Singapore
- **B.S.** **North China Electric Power University [🌐]** *09 2013 - 06 2017*
  School of Electrical and Electronic Engineering Beijing, China

Research Experience

- **Thesis Topic: General and Generalized Depth Perception Framework** *09 2019 - 06 2025*
  Xi'an Jiaotong University Xi'an, China
  - My research focuses on developing a unified model for perceiving diverse 3D scenes in open environments for embodied intelligence. Autonomous agents, equipped with sensors like cameras, LiDAR, ToF, structured-Light, or their combinations, must function effectively across diverse indoor and outdoor scenes. To address these challenges, we propose a general and generalized framework to robustly perform depth estimation/completion/enhancement using a single model, enabling accurate scene depth perception across varying scenes and sensors.

- **Thesis Topic: Generalizable Depth Completion Model** *12 2023 - 12 2024*
  Nanyang Technological University Singapore
  - This research focuses on robustly acquiring accurate dense metric depths from sparse depth measurements, supporting precise spatial perception for downstream applications. We have developed an advanced and highly generalizable depth completion technique capable of performing effectively in zero-shot and few-shot scenarios. Our approach demonstrates impressive generalization on multiple benchmarks, providing reliable metric depth data for comprehensive 3D scene understanding.

Publications and Patents

[B.1] M. Yang*, **H. Wang**, and N. Zheng. An Iterative Method of Depth Map Structure Restoration based on Structural Similarity between RGB and Depth. *Chinese Patent*, Patent No. ZL200010007508.X, 2020.

Research Projects

- **A General Model of Single-View 3D Perception for Multi-Modal Autonomous Agents** *12 2022 - 06 2025*
  ***Responsibility**: Core Member. **Source**: The National Natural Science Foundation of China* Xi'an, China
- **A General Depth Perception Model** *01 2022 - 12 2023*
  ***Responsibility**: Project Leader. **Source**: The Basic Research Foundation of Xi'an Jiaotong University.* Xi'an, China

Honors and Awards

- **Outstanding Graduate Student** *10 2024*
  Xi'an Jiaotong University
- **Baosheng Hu Scholarship (Top 5%, 1st Place)** *09 2024*
  Xi'an Jiaotong University
- **Academic Star of the IAIR (Top 1%)** *01 2024*
  Xi'an Jiaotong University
- **Academic Scholarship (Top 5%, 1st Place)** *10 2023*
  Xi'an Jiaotong University
- **Qianheng Huang Scholarship** *10 2023*
  Xi'an Jiaotong University
- **Joint Ph.D. Scholarship** *07 2023*
  China Scholarship Council (CSC)
- **Invited Oral Presenter** *07 2023*
  Xi'an Jiaotong University
- **College Scholarship** *11 2015*
  North China Electric Power University

Research Skills

- **Programming Languages:** Python, Pytorch, Matlab, C, LaTeX
- **Operation System:** Linux, Windows, MacOS
- **Languages:** Chinese, English
